DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by **JP (2002-285852)**. **JP (2002-285852)** discloses the applicants primary inventive concept as assessed in page 8 of applicants response dated 1/12/06, but contrary to applicants argument that the '852 patent does not disclose a metal latch element that cooperates with a magnet to releaseably latch the damper in the open and closed positions, the examiner disagrees, and directs the applicants attention to figure 2 which shows one position of the magnets (4, 5, 6) including an arrow indicating the motion that the magnet 6 takes to contact magnet 4. It can be assessed that the magnets can return to their original positions as shown in Figure 2, in which case the magnets (metal elements) are inherently releaseably connected (ie: latched) between an open and closed position. It is for this reason that JP '852 is considered to anticipate the applicants invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-24 and 26-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP (2002-285852) in view of Reinicke et al/Oliver (5,083,744). JP (2002-285852) discloses the applicants primary inventive concept as stated above, but does not specifically the type of motor as specified by the applicant. Reinicke et al/Oliver teaches a DC motor similar to the applicants claimed invention including a stator (30), rotor (13), local stop lug (46) to assure positive location of angular limits of 90 degree rotary excursion, winding spans (A & B), SEE Figure's 4 & 5, opposed windings having the same polarity (SEE column 4, lines 20-49), latching magnet (51) and armature magnet (40), etc. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to which the subject matter pertains, to have modified the invention of JP '852 by substituting in the motor of Reinicke et al/Oliver for the purpose of fast opening and closing of the damper.

Allowable Subject Matter

Claims 25 & 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
